Course Speaker

Dr. Bach Le completed his specialty training in Oral & Maxillofacial Surgery at Oregon Health Sciences University. He is currently Clinical Associate Professor of Oral & Maxillofacial Surgery at the USC School of Dentistry and Assistant Director of Residency Education at USC Medical Center. Dr. Le is a published author in numerous scientific journals and has lectured extensively about dental implants and bone regeneration. He has been a featured speaker at the national meetings of the American Association of Oral & Maxillofacial Surgeons, the Academy of Osseointegration, the USC Periodontal & Implant Symposium, the California Association of Oral & Maxillofacial Surgeons and the California Dental Association.

Synopsis

This advance bone graft course will feature scientific lectures and a hands-on cadaver workshop. The course will focus on the most current techniques in bone grafting to improve long term clinical success with dental implants. This course is designed for the clinician that has prior implant experience and would like to broaden his/her knowledge and scope of practice and improve surgical skills.

Upon completion of this course, participants should be able to:

- Know various techniques for a traumatic teeth extraction
- Perform socket preservation
- Understand bone biology and graft healing
- Compare various graft materials
- Understand minimally invasive ridge augmentation techniques
- Understand the impact of various flap designs on overall esthetic results
- Understand risk assessment for immediate versus delayed implant placement
- Recognize and treat graft complications
- Position an implant into a fresh extraction site.
