

Complete Dentate Checklist

	Class I	Class II	Class III	Class IV
Teeth Condition				
Ideal or minimally compromised-3 or less teeth in one sextant				
Moderately compromised-4 or more teeth in 1-2 sextants				
Substantially compromised-4 or more teeth in 3 to 5 sextants				
Severely compromised-4 or more teeth - all sextants				
Occlusal Scheme				
Ideal or minimally compromised				
Moderately compromised-anterior guidance intact				
Substantially compromised-extensive rest/same OVD				
Severely compromised-extensive rest/new OVD				
Conditions Creating a Guarded Prognosis				
Severe oral manifestations of systemic disease				
Maxillomandibular dyskinesia and/or ataxia				
Refractory patient				

NOTE: Individual diagnostic criteria are evaluated and the appropriate box is checked. The most advanced finding determines the final classification.

Guidelines for use of the worksheet

1. Consideration of future treatment procedures must not influence the diagnostic level.
2. Initial preprosthetic treatment and/or adjunctive therapy can change the initial classification level.
3. If there is an esthetic concern/challenge, the classification is increased in complexity by one or more levels.
4. In the presence of TMD symptoms, the classification is increased in complexity by one or more levels.
5. It is assumed that the patient will receive therapy designed to achieve and maintain optimal periodontal health.
6. Patients who fail to conform to the definition of completely dentate should be classified using the classification system for partial edentulism.
