

**ACP Digital Dentistry Symposium 2018**  
**Digital Dentistry: From Application to Integration**  
**Feb. 20-21, 2018 | Chicago**

**Hands-on Digital Workshop**  
**Tuesday, Feb. 20 | 8:30 A.M. – 12:30 P.M.**

Sponsored by:

**Recommended for:** Entry Level Doctors (new users), Existing digital dentistry practitioners (experienced users)

**Prerequisites:** Prerequisite questionnaire we will send to all participants in advance.

**Presenters:** Dr. Alan Jurim, Dr. Barbara Jurim

**Fee:** \$99

**Description:**

During this interactive hands-on course, we will show you and your team how to integrate your practice to today's new technology. You will see and feel the opportunity for your dental practice to move to the next level focusing on occlusion, virtual smile design, and optimal use of unique tools available with today's digital workflow. Learn how to bend your traditional techniques with new digital integrations for enhanced case acceptance, staff exuberance, and increased predictability for incredible outcomes.

For the teams who have been successfully using intraoral scanning in the office, now experience hands-on techniques creating new workflows and expanding your digital dentistry. This hands-on is ideal for the intermediate digital team members looking to expand and add new digital services in the office.

**Objectives:**

- How to establish an efficient office protocol for obtaining all the digital records needed for digital treatment planning.
- Learn and practice the most predictable and efficient digital intraoral scanning workflows.
- See how digital workflows improve esthetic case outcomes and patient experience.
- See the incorporation of 3D printing in the office environment.
- Learn what to scan for simple restorative workflows with predictable outcomes.
- Learn how to create digital orders and efficiently communicate with your lab using the cloud while remaining HIPAA compliant.
- Gain valuable tips and tricks from experienced digital dentists for highly predictable model-free restorations.
- Learn techniques to improve full arch bite registrations for complex case success.
- Learn how to efficiently scan for digital bite splints, Invisalign, and Implant planning.

## **Agenda**

8:30 – 9:00 A.M.

**Registration / Breakfast**

9:00 – 9:15 A.M.

**Welcome and Team Introductions**

9:15 – 9:45 A.M.

**Workshop: Understanding the “digital order” and Dental Desktop**

3 Scenarios Demonstrated

1. Order types and order workflows (smile design, implants, complex rehabilitations)
2. Scan streams and order management
3. Enhancing the patient experience

9:45 – 10:15 A.M.

**Hands-On: Working with Dental Desktop**

10:15 – 10:45 A.M.

**Workshop: Scan strategies for simple workflows**

2 Scenarios Demonstrated

1. Study Models scanning protocol
2. Pre-preparation scanning protocol

10:45 – 11:15 A.M.

**Hands-On: Scanning for simple workflows**

11:15 – 11:30 A.M.

**Break (15 min)**

11:30 A.M. – 12:00 P.M.

**Workshop: Digital Bite Registrations**

3 Scenarios Demonstrated

1. Optimal bite registration for simple workflows (pre-prep bite scanning)
2. Techniques for full arch bite registrations
3. Digital facebow registrations

12:00 – 12:30 P.M.

**Hands-On: Scanning complex bite registrations**

12:30 P.M.

**Questions & Answers**
