#### Registration Open

Enjoy breakfast with fellow members from your region and ACP Board members.

#### Town Hall Breakfast Meeting

Enjoy breakfast with fellow members from your region and ACP Board members.

#### Corporate-Sponsored Symposia

Each session is hosted by a corporate supporter of the ACP. Attend one to earn CE credit. No advance registration is necessary.

---

**Improving Clinical Outcomes with Integrated Digital Advances for Shorter Time to Teeth**  
**Peter Wöhrle, DMD, MMSc**

The integrated workflow with digitally assisted treatment planning based on prosthetic outcomes and guided implant placement is here to stay. This treatment approach has been shown to deliver more efficient care with consistently better patient outcomes. Combining intraoral and CBCT data sets with diagnostic and treatment planning skills and properly executed guided surgery based on ideal prosthetics elevates the level of excellence. This treatment modality improves efficiency, safety, and overall patient experience. Emphasis will be placed on the latest developments for a digitally integrated treatment workflow for shorter time to teeth.

At the conclusion of this session, attendees should be able to:

- Recognize the importance of thorough diagnosis and treatment planning through the virtual world and understand guidelines for proper implant restoration with the end prosthetic result in mind for optimal patient outcomes.

---

**Utilizing Advancements in Science and Technology**  
**Markus Blatz, DMD, PhD**

In an ever-changing and challenging world of treatment solutions and materials, this presentation will review the latest workflows and materials available for treating patients. New innovative solutions that increase the overall patient experience and provide a truly patient-centered approach will be discussed. From digital impression to final delivery, the prosthetic design is controlled for optimal results and patient satisfaction.

At the conclusion of this session, attendees should be able to:

- Understand the integrated treatment workflow and material selection for the delivery of individualized prosthetics.
