

Dr. Robert S. Conrad

10/19/1960-10/17/2013

Anyone who knew "Bob", was better for it. He was uplifting, caring, and loved sharing stories; especially about his family. He took the time to really listen to people and invested so much of himself into the lives of others.

Just one example is how every year he would drive hours to a spot on the MS150 bike ride, where in full Scottish regalia, he would play his bagpipes to get the riders over the tough hill. (You can watch the videos here www.youtube.com/drrobertconrad).

His true legacy is left with us in the form of his family. Bob is survived by Terri, his wife, three beautiful daughters, his parents, and brother. Bob's family sincerely appreciates the prayers and outreach of support they are receiving through this very difficult time.

To express sympathy to the family, you may post a message to his Facebook page or send an email to drrobertconrad@gmail.com and the messages will be compiled and passed along to his family.
