Predictable Implant Treatment – Start with the End in Mind

Peter S. Wohrle, DMD, MMSc

Recent advancements in digital dentistry have focused on the integration of the prosthetic and surgical planning. With a focus on NobelClinician[®], discover the ways you can co-plan cases with your surgical partners, allowing treatment planning to begin with the prosthetics in mind, rather than just the implants in the center of the projected site. This crucial information is available to assist diagnosis, formulation of treatment planning, and surgical and prosthetic execution.

A “Best” Clinical Practice Approach to Implant Healing, Restoration, and Follow Up

Chandur Wadhvani, DDS, BDS, MSD

Discover the latest research, developments, and techniques that will not only lead to greater success but also improve the understanding and skill level of the clinician. Cement vs. Screw Retained, healing abutments, and radiography will be discussed with an emphasis on evidence-based best clinical practice.

All-on-4[®] Treatment Concept – Expanded Applications for Complicated and Compromised Patients

Stephen M. Parel, DDS, FACP

The concept of tilting implants to create an optimal AP spread and enhance base stability for full-arch implant restorations has allowed treatment opportunities for a broader segment of patients. Learn from a prosthodontist whose experience has been unparalleled in private practice, clinic-based, and research founded. Learn how to minimize your complications and pitfalls during the treatment process.
