

# DIGITAL WORKFLOWS: FROM SIMPLE TO COMPLEX REHABILITATION

Feb. 21-22, 2017 • Chicago

During the Mid-Winter Meeting  
of the Chicago Dental Society

**ACP** | AMERICAN COLLEGE OF  
PROSTHODONTISTS  
Your smile. Our specialty.®

This symposium is designed for dental professionals who are interested in state-of-the-art digital solutions for the treatment of restorative patients. By enabling improved efficiency and collaboration, and delivering extraordinary clinical and esthetic results, digital technology has become essential to practitioners who would like to lead the future of integrated patient care. Attendees will learn best practices and see actual clinical workflows for digital treatments ranging from individual tooth restoration to complex rehabilitation.

With all-new breakout sessions for non-owners, owners, and advanced operators, this symposium has been designed to meet the needs of practitioners who are new to the use of digital systems as well as those looking to deepen their expertise in the area.

**TARGET AUDIENCE:** Prosthodontists, residents, dental students, dental laboratory technicians, general dentists, and other dental professionals with an interest in clinical and laboratory technology.
