This will be a highly interactive session with an immersive experience in the application of digital technology for our patients. Simultaneous live onstage and remote patient care will demonstrate a broad range of digital workflows from the simple to the most complex prosthetic scenarios. A portion of the live program will be in 3D, with 3D glasses distributed to every attendee for a revolutionary perspective on patient treatment. This will include onstage e.max CAD finishing by a master technician, and a single implant placement/restoration using an immediate smile strategy.

**Saturday, Nov. 4, 1:00 – 4:00 p.m.**  
**Practice Management**

This session will deliver valuable insights from experienced practitioners who understand the challenges you face. Speakers will share real-life examples and strategies you can implement in your practice.
