**American College of Prosthodontists to Host Digital Dentistry Symposium in Chicago**  
*Dental innovators to present the latest digital advances in patient care*

CHICAGO – The American College of Prosthodontists (ACP) is pleased to announce the 2019 [Digital Dentistry Symposium](#) will be held in Chicago Feb. 19-20. This unique two-day event is designed for dental professionals who are interested in state-of-the-art digital solutions for the treatment of their patients.

“The symposium is a place where anyone that’s interested in digital dentistry can come and see the current state of technology, learn practical hands on tips from the masters, and look to the future of dental technology” said program chair Dr. Mark Ludlow. “Our goal is to help dental professionals find practical clinical applications that simplify workflows and improve patient results.”

Led by innovators in dental technology, the symposium features engaging lectures, and break-out sessions organized by experience level from novice to advanced. There will also be hands-on workshops that allow attendees to try out the latest digital systems and walk away with a solid working knowledge of technology in the marketplace.

Speakers will cover topics such as 3D printing in dentistry, digital dentures, intraoral scanning, and chairside milling. Attendees will learn how to integrate digital systems into their practices, determine their optimal workflow for digital treatments, and understand best practices for the use of digital technology - from individual tooth restorations to complex rehabilitations.

This meeting is open to prosthodontists, general dentists, residents, dental students, dental laboratory technicians, and dental professionals with an interest in digital dental technology. Those in attendance will earn continuing education credits through the American Dental Association’s (ADA) CERP program, the Academy of General Dentistry’s (AGD) PACE program, and through the National Board of Certification in Dental Laboratory Technology (NBC) for dental technicians.

To see the speakers, learn about the hands-on workshops and register, visit [Prosthodontics.org](#).

####

**About Prosthodontists**

A prosthodontist is a dental specialist who focuses on the restoration and replacement of missing teeth and other oral or facial issues. Prosthodontists specialize in helping patients with implants, dentures and veneers, all the way to full mouth and jaw reconstructions.

**About the ACP**

The American College of Prosthodontists (ACP) is the only ADA recognized organization for the specialty of prosthodontics. Founded in 1970, the ACP is dedicated to advancing the art and science of prosthodontics and promoting the specialty to the public and dental professionals. For more information, consumers can visit [GoToAPro.org](#) and dental professionals can visit [Prosthodontics.org](#).
